"We will be discussing the July Trials
and Club business"

President's Message,

Dear members:

As summer arrives, OCOD is preparing for our annual Obedience Trial. I always enjoy seeing our members and their dogs demonstrate the impressive result of the hours (and more hours) they have spent training. Good luck to all.

With our lease in place and building improvements (new A/C) reaching completion, we offer a training facility that is one of the best in Florida – perhaps even in the Southeast US. Our membership includes people new to dog training, experienced in dog training, and individuals who compete in national level events. We are building a strong organization.

Still, there is room for improvement and we experience growing pains from time to time. Running an operation of our size requires constant attention and numerous decisions and we strive to be fair and reasonable. However, if a member sees room for improvement, please let me know. As long as we continue to work and think as a team, we can achieve great things.

At the Obedience Club of Daytona, FL, several teams earned their Urban CGC titles. We are enjoying being out in the community to showcase the skills and manners of our dogs. Our Urban CGC Evaluators were Janet Berry, Renee Johnson and Ralph Orlando.

Important Notes About Our Trial July 16th & 17th

The Trial will start at 8:00 am, Stewards need to be there at 7:00 and no later than 7:15.

If you are a Steward at our Trial, you will need to wear your Club shirt with dark shorts or slacks. Remember if you are showing, please bring another shirt to change into because you can't wear your Club shirt in the ring.

Heat Stroke

Dogs and cats can't perspire and can only dispel heat by panting and through the pads of their feet. If you suspect heat stroke in your pet, seek veterinary attention immediately.

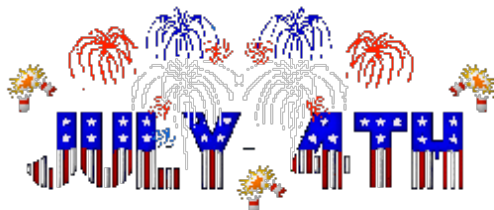

Signs of heat stroke include *(but are not limited to):*

- 
- Body temperatures of 104-110F degrees
 - Excessive panting
 - Dark or bright red tongue and gums
 - Sticky or dry tongue and gums
 - Staggering
 - Stupor
 - Seizures
 - Bloody diarrhea or vomiting
 - Rapid heartbeat

Note: Short-nosed breeds such as Bulldogs, Pugs, etc., large heavy-coated breeds, and dogs with heart or respiratory problems are more at risk for heat stroke.

Cooling Your Pet

- Find some shade. Get your pet out of the heat.
- Use cool water, not ice water, to cool your pet (very cold water will constrict the blood vessels and impede cooling).
- Place cool wet cloths on feet and around head.
- Offer ice cubes for the animal to lick.
- Contact your your veterinarian.
